PRAYER FOR HEALING

Mi shebayrach avoteinu,
M'kor hab'racha l'imotaynu,
 May the source of strength, Who blessed the ones before us,
 Help us find the courage to make our lives a blessing,
 And let us say, Amen.
Mi shebayrach imotaynu,
M'kor habrachah l'avotaynu,
 Bless those in need of healing with *r'fuah sh'laymah,*
 The renewal of body, the renewal of spirit,
 And let us say, Amen.

THURSDAYS - JANUARY 17, 24 & 31 -7 pm

THE COMMANDMENTS OF THE BOOK OF EXODUS
 Rabbi Grussgott will be teaching this series. Toward the middle of
 the Book of Exodus, the narrative portion of the *Torah* ends, and the
 legalistic mode of delineating the commandments begins. Many Jews
 find these sections boring! But that need not be the case. See the *mitzvot*
 come alive in this three part series.

ISRAEL UPDATE -- January 11, 2019

U.S. Buys More Israeli Defense Systems to Protect Tanks, APCs
The U.S. military awarded a nearly \$80 million contract for the purchase of an Israeli-developed missile defense system to protect tanks and armored personnel carriers, after reaching a similar \$200 million deal this past summer, the Rafael Advanced Defense Systems contractor announced Wednesday. According to The Times of Israel, the United States is expected to pay another \$120 million for more defense systems as part of the agreement, pending final approvals, bringing the total value of the two contracts to approximately \$400 million, according to a spokesperson for the weapons manufacturer. The systems, which block incoming anti-tank missiles and rockets, will be supplied to the U.S. Army by the American defense contractor Leonardo DRS, Inc., which partnered with Rafael to manufacture them. The Trophy, known in Hebrew as *Me'il Ruah*, or "Windbreaker," is an active defense system manufactured by Rafael that is designed to protect tanks and other armored vehicles from missiles and rockets. The system is made up of a radar detection system that spots incoming missiles and predicts their trajectories, and launchers that fire buckshot-like metal pellets, which cause the incoming missile or rocket to detonate away from the tank.
